

# ZAKOPANE CONFERENCE ON NUCLEAR PHYSICS

*Extremes of the Nuclear Landscape August 31 - September 7, 2014*

## Awarded posters

**Hanne Heylen, KU Leuven**

Nuclear moments of the neutron-rich Mn isotopes around  $N=40$

**Łukasz Iskra, IFJ PAN, Kraków**

High-spin shell model states in odd neutron-rich Sn isotopes populated in fusion-fission reactions

**Wojciech Krzemiński, Jagiellonian University, Kraków**

Search for eta-mesic nuclei with WASA-at-COSY

**Krzysztof Miernik, University of Warsaw**

Phenomenological model of beta-delayed neutron-emission probability

**Kseniia Rezyrkina, CSNSM Orsay**

First experimental tests of SHELS: a new heavy ion separator at the JINR

**Jasmine Sethi, Tata Institute of Fundamental Research, Mumbai**

Low-lying states near the long lived isomer in  $^{108}\text{Ag}$

**Victoria Truesdale, University of York**

Beta-delayed fission studies of the very neutron-deficient isotopes  $^{194,196}\text{At}$  and  $^{200,202}\text{Fr}$  at ISOLDE

**Anna Zdeb, UMCS, Lublin**

Spontaneous fission half-lives within semi-empirical model
